INNOVATION

**2007, SION - SWITZERLAND**  
**CAMILLE COTTAGNOUD, AN**  
**UNCOMPROMISING AND CREATIVE**  
**DIRECTOR OF PHOTOGRAPHY,**  
**PONDERS...**

As an experienced image professional, it dawned on him that the video equipment available in the market does not allow him to unleash the full potential of his gear.

So he started to picture a system for cameras that would best meet his expectations and make chief operators' work technically more efficient and intuitive.

# EXPLORATION

WHETHER IN THE ARID DESERT,  
HIGH IN THE MOUNTAINS  
OR IN THE HUMID JUNGLE

The Caman system was designed to follow you in all your projects, even in your most demanding shoots.

Thanks to handpicked quality materials, it is resistant to sand, water, dust and salty air.

EXCELLENCE

## FROM DREAM TO REALITY

Caman is the realisation of a dream that took more than 10 years to materialize. A decade of R&D resulted in unique ergonomics, and gave life to a comfortable system, adaptable to all sizes of hands.

The rig - coupled with the system - is easily adjustable and offers great flexibility (e.g., shoulder mount, tripod, handheld cameras).

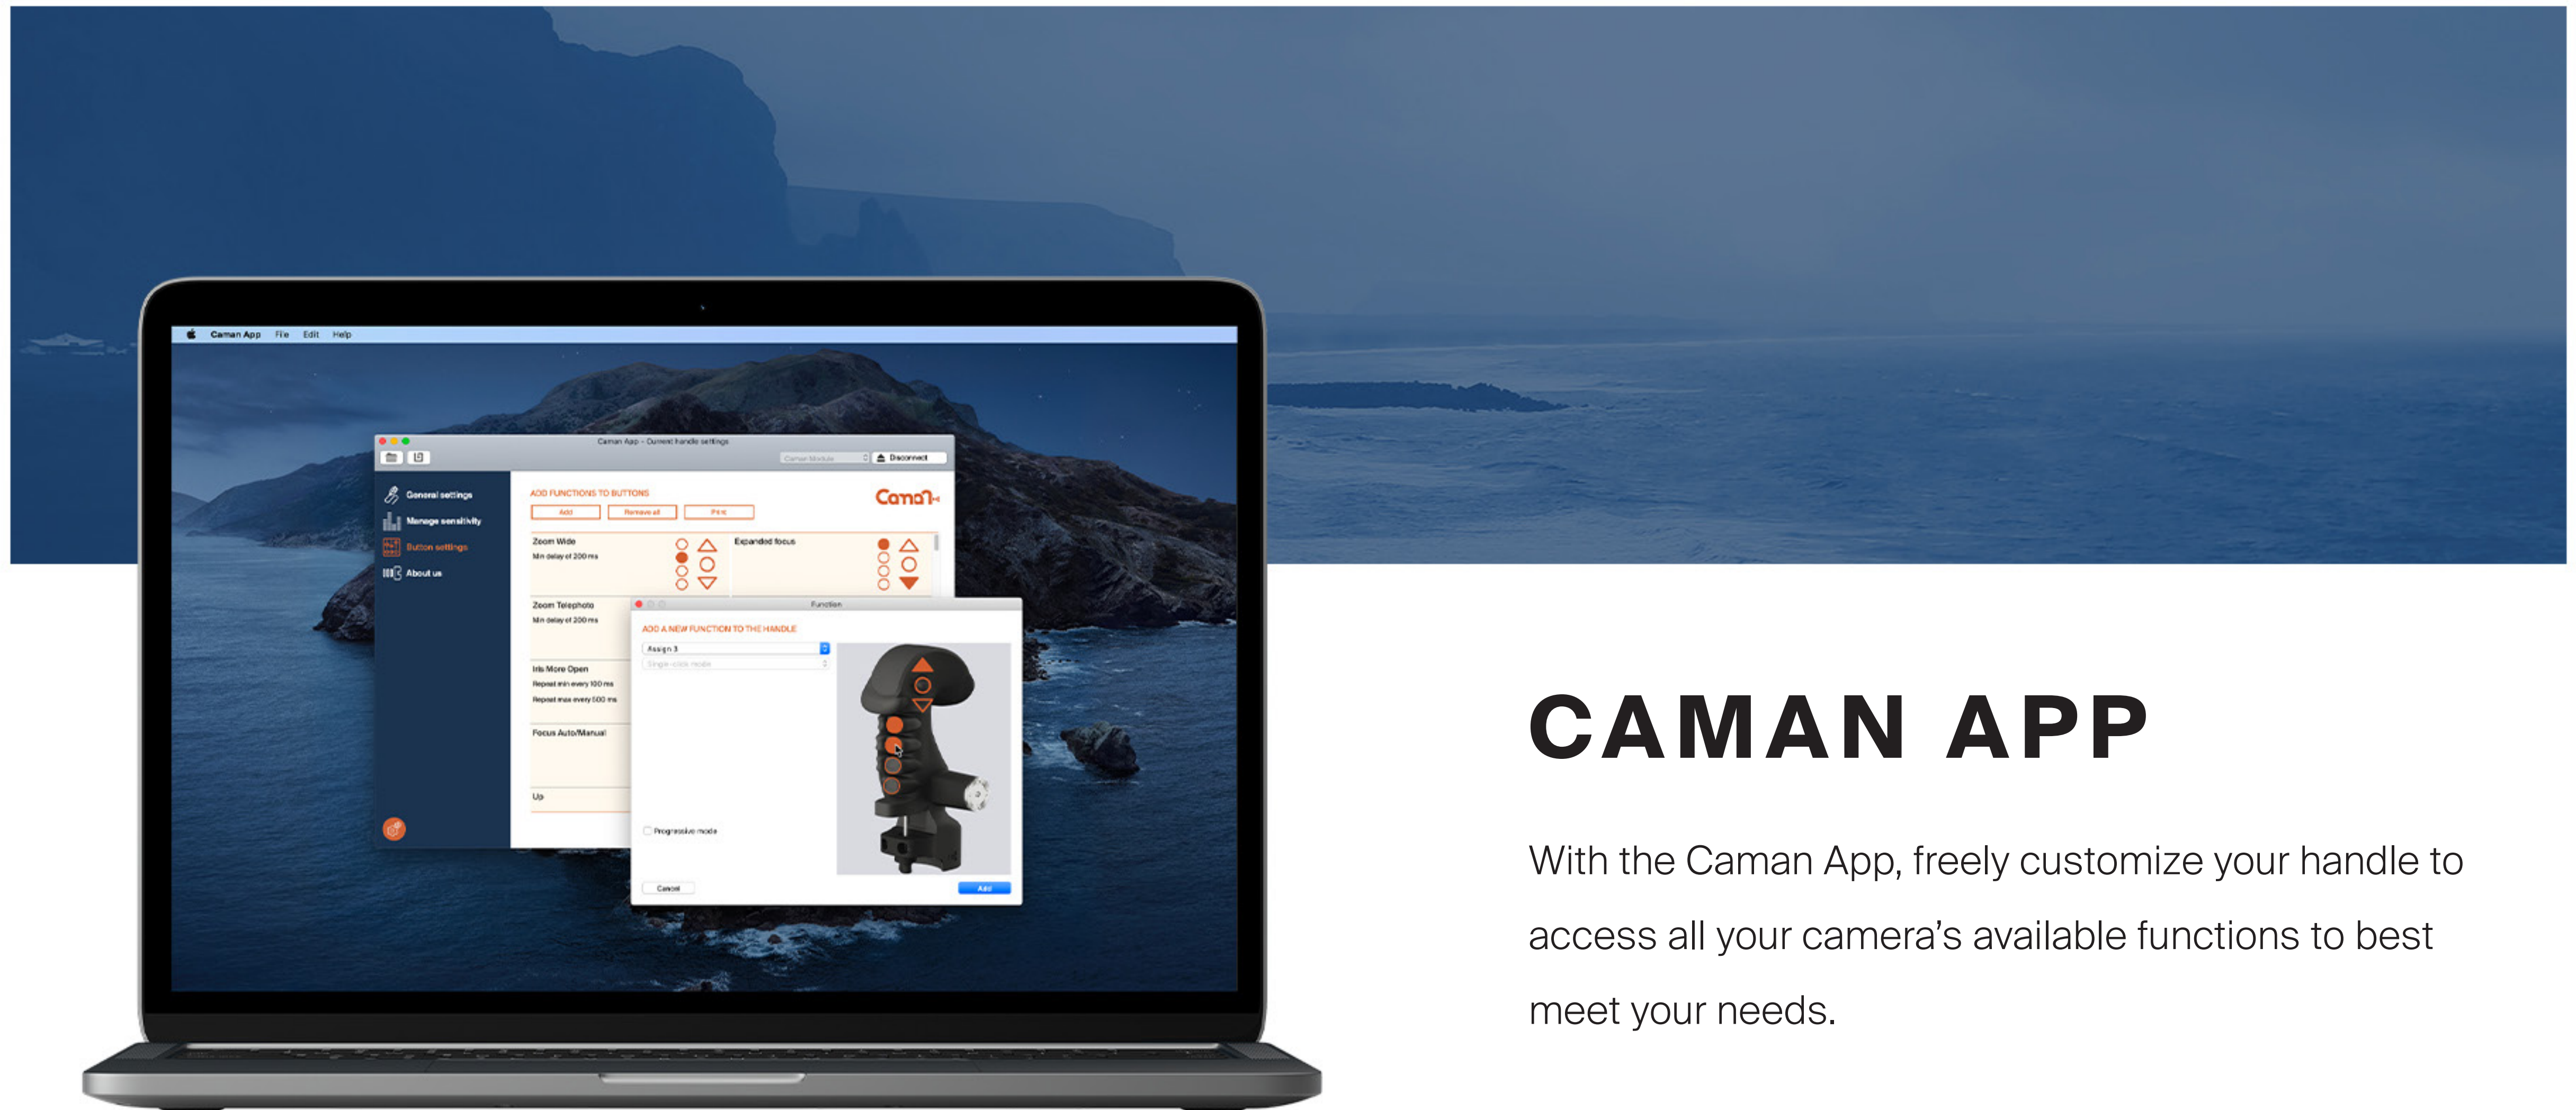

Canon

Stop thinking. Just create...

# CAMAN APP

With the Caman App, freely customize your handle to access all your camera's available functions to best meet your needs.

**Autonomy** - The Caman system is the ideal tool for documentaries, especially immersive shoots where it is always best to be alone, reactive, compact, and discreet.

**Tristan Aymon**  
Cameraman

**Productivity** - On a shoot, every minute counts. The ease of configuration of my video camera and the reactivity offered by the Caman system allow me to consider more shots in a day.

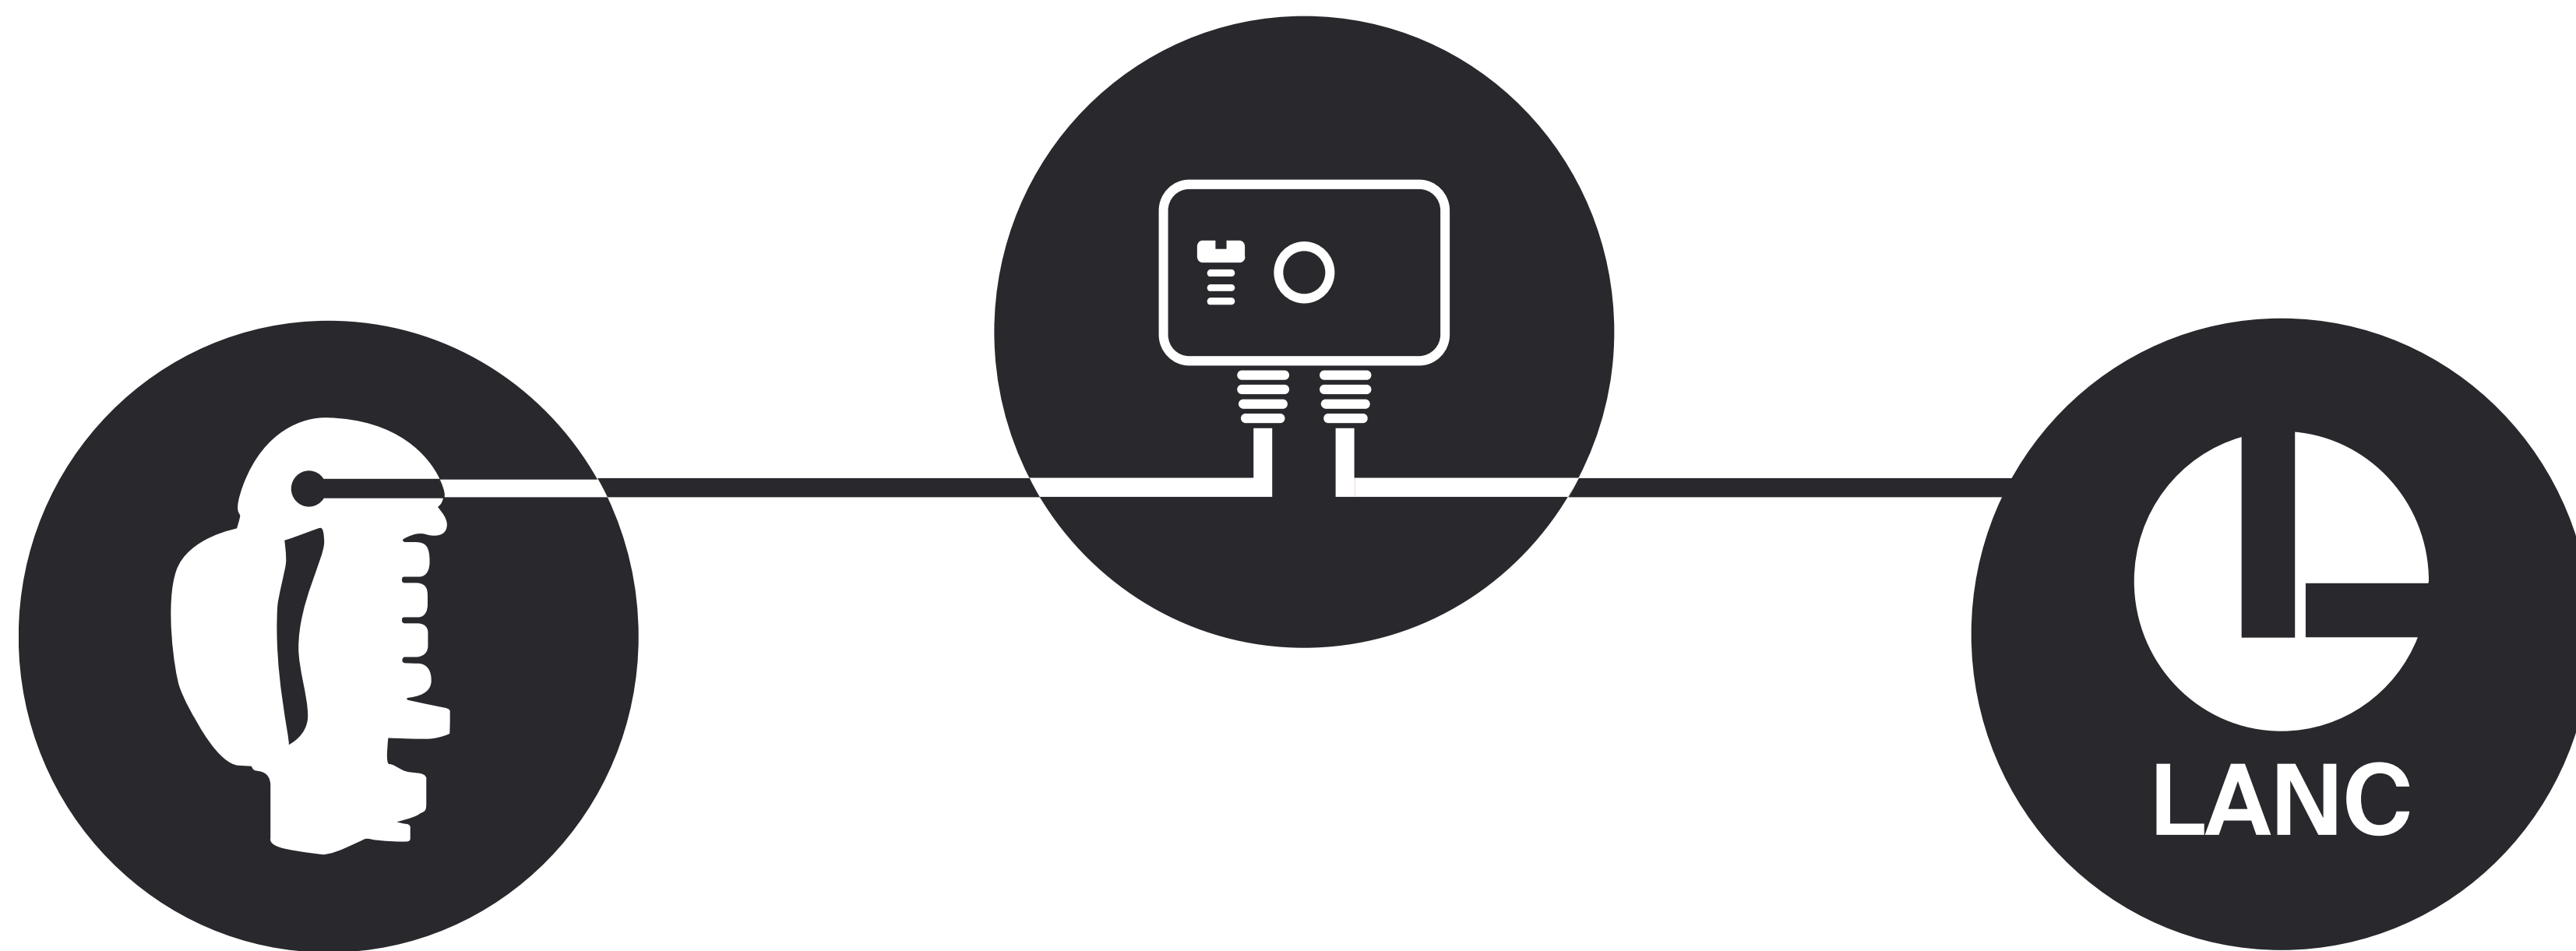

**Fredrik Gabrielsson**  
Director of photography

**Convenience** - With a classic hand-grip, you often have to remove your eyes from the viewfinder to find and trigger camera functions. Now I manage all my camera settings with my fingertips and I film with more comfort and serenity.

**Leandro Monti**  
Director of photography

## COMPATIBILITY

Compatible with any camera with a remote jack (LANC).

The list of accessible functions may vary depending on your video camera brand and/or model.
